

C. difficile Myth #8

12/14/2015

MYTH:

The gray top Sani-Cloths are *not* effective against *C. difficile*.

FACT:

At UCSF we use Sani-Cloth AF3 wipes to eliminate spores from high touch surfaces and shared equipment.

The spores adhere to the moist wipe and the friction from mechanical cleaning **REMOVES** the spores from surfaces.

C. difficile HO Rate FY16 TD through November: 11.8/10,000 patient days

IAP Goal FY2016: Reduce hospital onset *C. difficile* rate to 11.1 cases / 10,000 patient days.
